

FVTRP-HHR Handheld Vent Tube Reader

The FVTRP-HHR Handheld Vent Tube Reader is a portable lightweight testing instrument built to detect the custom RFID chip set of a vent tube with easy-to-see green LED indication of passing result. In the event of a failed vent tube, the display will simply show READY and the LED will not illuminate.

1. Power On Device

2. Touch Vent Tube Head to Test Area

3. Pass Results in Green Light
