

## FVTRP-HHR

The FVTRP-HHR Handheld Vent Tube Reader is a portable lightweight testing instrument built to detect the custom RFID chip set of a vent tube with easy-to-see green LED indication of passing result. In the event of a failed vent tube, the display will simply show READY and the LED will not illuminate.

1

Power On Tester

2

Touch Vent Tube Head  
to Test Area

3

Pass Results in Green Light

Made in America
